```

## Property Considerations

### One System, One Meter

Each renewable power generation system can connect to one meter. A private generation system can service an accessory unit, but must connect to the DTE distribution grid via a single meter.

### Roof Specs

Not every property can effectively accommodate solar power. Your roof pitch, shade and the angle of the sun are all factors.

### Customer Usage

Systems must be limited in size, not to exceed the customer's self-service needs of the rate schedule to which the Rider 18 Distributed Generation Program is attached.

Lastly, creating layouts by just using utility classes, FLEX classes to be specific. This example shows creating 3 cards - row on wider screens and column on smaller screens.

Note: There are font, padding, margin, flex and text-specific utility classes available.

    </div>
  </div>
</div>
```

### Set a Schedule

Take advantage of Off-and Mid-Peak times by setting a schedule on your thermostat that reduces heating and cooling temperatures during On-Peak hours.

**Tip**: During hot summer days, pre-cool your home and allow the temperature to rise during On-Peak times.

### Laundry on Weekends

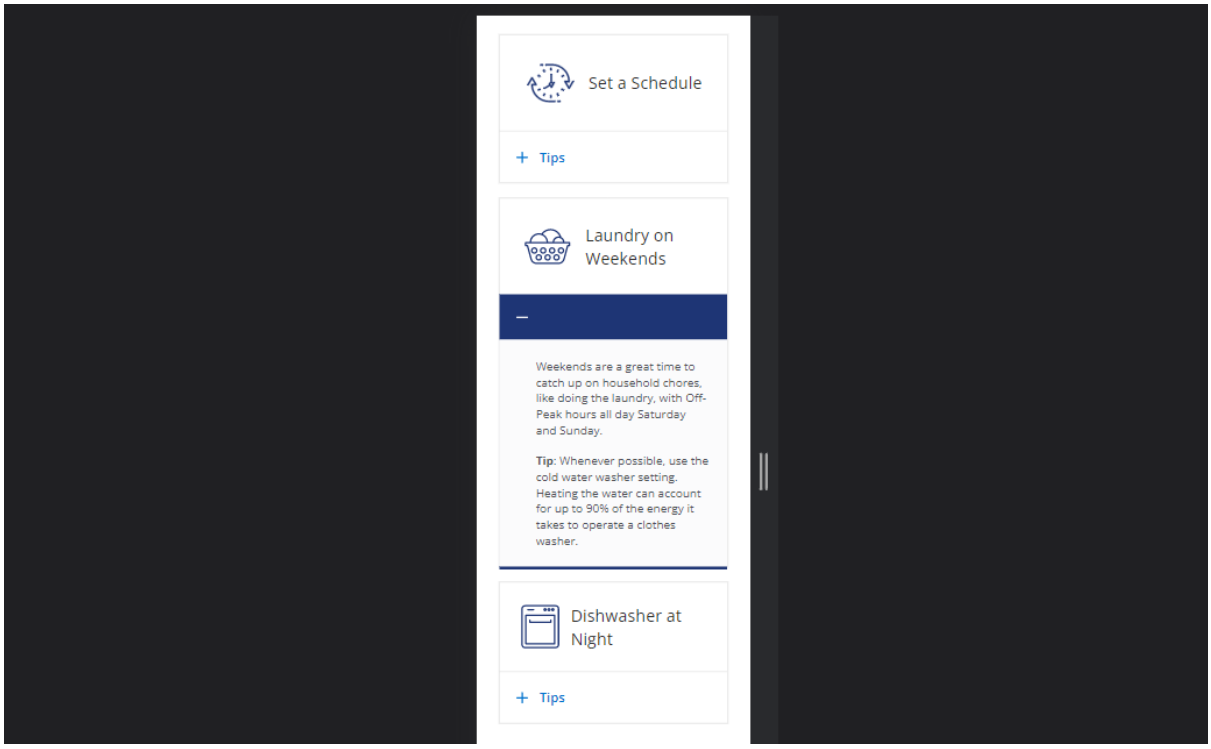
Weekends are a great time to catch up on household chores, like doing the laundry, with Off-Peak hours all day Saturday and Sunday.

**Tip**: Whenever possible, use the cold water washer setting. Heating the water can account for up to 90% of the energy it takes to operate a clothes washer.

### Dishwasher at Night

Delay running your dishwasher until you're heading off to bed. That will give you plenty of time to load it up and save during Off-Peak hours.

**Tip**: Fill up your dishwasher before running it. About the same amount of energy and water are used in each wash, regardless of load size.



## JSTL tags

if-else code

```
<c:choose>
    <c:when test="${fn:length(dteCustomerDetails) eq 1}">
        <c:forEach var="progDetails" items="${dteCustomerDetails.programDetails}">

## Google Tag Manager Implementation

1. Create a `mediator.publish` function

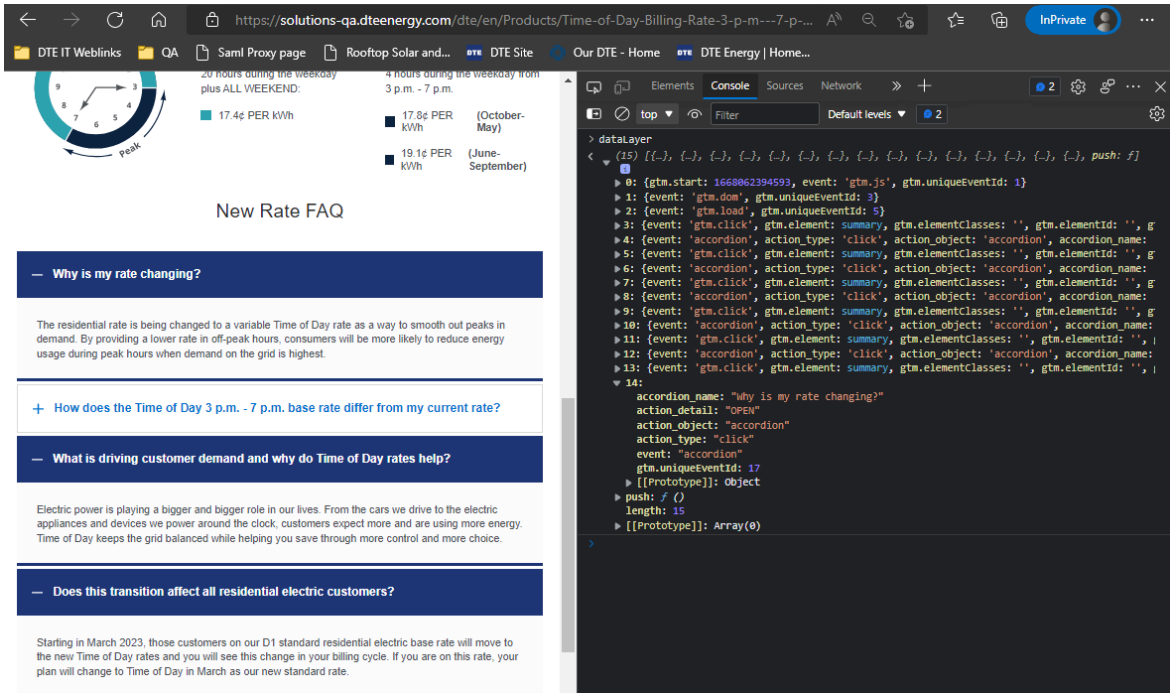
```
acc.gtm.js ...\common\... M ×   acc.common.js ...\ybase-0.1.0\... M   acc.rts.js
> hybris > bin > custom > dteb2cutil > dteb2cutilstorefront > web > webroot > _ui > responsive > common > js >
    onMigpGeneric_gtm: function (programType, productCode, programName, actionName,
    },

    onDTEAccordionClick_gtm: function (accordion_name, action_detail) {
        window.mediator.publish('onDTEAccordionClick_gtm', {
            event: 'accordion',
            action_type: 'click',
            action_object: 'accordion',
            accordion_name,
            action_detail
        });
    },
```

2. Subscribe to above function and push required fields to `dataLayer`.

```
acc.migp.js   googleTagManagerDataLayer.tag M ×   {} migp-common.less M
> custom > dteb2cutil > dteb2cutilstorefront > web > webroot > WEB-INF > tags > shared > analytics > googleTagManagerD
768  function trackOnMigpGeneric_gtm(programType, productCode, programName, actionName, act
782  }
783
784  window.mediator.subscribe('onDTEAccordionClick_gtm', function(data) {        You, 7 minu
785      const { event, action_type, action_object, accordion_name, action_detail } = data;
786      window.dataLayer.push({
787          event, action_type, action_object, accordion_name, action_detail
788      });
789  });
790
```

3. Call the publisher function for the events.

```
cc.common.js ...\ybase-0.1.0\... M   acc.rts.js   acc.common.js ...\common\... M   acc.migp.js
dteb2cutilstorefront > web > webroot > _ui > responsive > common > js > acc.common.js > ready() callback > accordionGTMClick >
100   $(document).ready(function(){
1027
1028      function accordionGTMClick() {
1029          $(".summary-detail summary").each(function(idx) {
1030              $(this).on('click', function () {
1031                  const detailStatus = $(this).parent("details").attr('open') ? 'CLOSE' : 'OPEN';
1032                  ACC.gtm.onDTEAccordionClick_gtm($(this).text(), detailStatus);        You, 12 hours
1033                  console.log($(this).text(), detailStatus);
1034              });
1035          });
1036      }
1037      if ($('.dte').length > 0) {
1038          dteTabbedNavigation();
1039          accordionGTMClick();
1040      }
1041  });
1042
```


4. Validate
